

# Songzhu (Sean) Zheng

23 Acorn Lane, Stony Brook, NY

zheng.songzhu@stonybrook.edu - (631)710-9042 - [www.linkedin.com/in/songzhu-zheng-18132abb](https://www.linkedin.com/in/songzhu-zheng-18132abb)

## Qualifications

---

- PhD student focusing on robust deep learning against label noise and data poisoning attack
- Experienced with machine learning modeling and statistical inference
- Problem solving, focus, persistence, excellent execution

## Education Background

---

<b>Stony Brook University</b> PhD. in Applied Math and Statistics (GPA: 3.95/4.0)	Jun. 2022 (Expected)
<b>Rice University</b> MA. in Statistics (GPA: 3.76/4.3)	Mar. 2017
<b>Communication University of China</b> BS. in Statistics (GPA: 3.80/4.0, rank 2/56)	Jul. 2015

## Experiences

---

<b>Research Assistant</b>	Stony Brook University	Aug. 2018—Present
<ul style="list-style-type: none"><li>• Design scalable, noise robust, and theoretically guaranteed deep learning models</li><li>• Develop detection method against to a generic family of trojan attack</li><li>• Perform spatial analysis to explore the association between tumor and immune cells</li><li>• Conduct hypothesis testing to support the hypothesis of the research team</li></ul>		
<b>Statistics Lecture Instructor</b>	Stony Brook University	Jul. 2018—Dec. 2018
<ul style="list-style-type: none"><li>• AMS-102 elementary statistics: classic probability and basic hypothesis testing</li><li>• AMS-315 data analysis: hypothesis testing, ANOVA, linear regression, and R programming</li></ul>		
<b>Data Analyst Internship</b>	Rice Kinder Institution	Jun. 2016—Aug. 2016
<ul style="list-style-type: none"><li>• Build pipelines that integrate R, SQL, ArcGIS, and geocode API to match database instances</li><li>• Develop matching algorithms that achieve over 95% instances matching accuracy</li></ul>		

## Projects and Competitions

---

<b>Label Noise in DNN</b>	Research Project	Aug. 2018—Present
<ul style="list-style-type: none"><li>• Propose a likelihood ratio testing procedure to correct noisy labels</li><li>• Propose a topology-based filtering procedure to collect clean data</li><li>• Establish theorems that guarantee the performance of these methodologies</li><li>• Develop algorithms that are highly scalable, easy to tune, and achieve state-of-the-art performance on both public and massive industrial level data sets</li></ul>		
<b>Deep Fake Detection Challenge</b>	Kaggle Competition	Apr. 2020
<ul style="list-style-type: none"><li>• Extract human face images from .mp4 files that are polluted by deep fake using MTCNN</li><li>• Develop a metric learning method to detect if a video contains deep-fake frames</li></ul>		
<b>XTX Forecasting Challenge</b>	XTX Competition	Sep. 2019
<ul style="list-style-type: none"><li>• Develop machine learning models to forecast the movement of an equity using TAQ data</li><li>• Run massive model selection procedure to pick the best classifier</li><li>• Deploy a XGBoost regression tree with DART booster and rank 76 out of 4000 submissions</li></ul>		
<b>Logistic Regression in Hadoop</b>	Course Project	Dec. 2018
<ul style="list-style-type: none"><li>• Write MapReduce to query data from HDFS and to finish the linear algebra calculation</li><li>• Deploy logistic LASSO regression to forecast equity movement in the IBM Ambari cloud</li><li>• Implement the iteratively reweighted least square algorithm to accelerate the optimization</li></ul>		

## Publications

---

- “A Topological Filter for Learning with Label Noise.” Neural Information Processing Systems (NeurIPS), 2020 (\*equal contribution)
- “Error-Bounded Correction of Noisy Labels.” International Conference on Machine Learning (ICML), 2020
- “A Movie Customer Satisfaction Index Model Based on Structural Equation Model.” International Journal of Arts and Technology (IJART), 2019
- “Measure Audiences' Satisfaction through User Generated Content: Satisfaction Research in Motion Picture Industry.” International Journal of Arts and Technology (IJART), 2017

## Awards

---

- |                                                         |                         |
|---------------------------------------------------------|-------------------------|
| • Merit Student (highest level within the university)   | Jun. 2015               |
| • Outstanding Student Leader (university level)         | Jun. 2015               |
| • CUMCM Math Modeling Contest (second prize in Beijing) | Nov. 2014               |
| • CUMCM Math Modeling Contest (first prize in Beijing)  | Nov. 2013               |
| • Outstanding Student Scholarship (university level)    | Nov. 2012 and Nov. 2013 |

## Programming Skills and Certificate

---

- Python (numpy, pandas, matplotlib, scikit-learn, pytorch, keras, tensorflow)
- R (ggplot2, tidyverse, spatstat, xgboost, glmnet, e1071, shiny, rhadoop, markdown)
- C++, SQL, MATLAB, Microsoft Office, Linux
- CFA (level-I passed)
